LEGENDA

- The diagram illustrates the well casing and the production test results. It shows a cross-section of the well casing with a central hole. The casing is labeled "SERIE CRETACICA A SCARSA PERMEABILITÀ" (Cretaceous series with low permeability). The casing is shown with a "ZONA DI SEPARAZIONE DI RESERVOIRI SUPERIORE ED INFERIORE" (Separation zone of upper and lower reservoirs). The casing is shown with a "UNIFORMITÀ DEL TOP CRETACICO" (Uniformity of the top Cretaceous). The casing is shown with a "OWC = -2350 m" (Oil Water Contact = -2350 m). The casing is shown with a "PROVE DI PRODUZIONE" (Production tests). The casing is shown with a "POZZO PRODUTTIVO AD OLIO" (Productive well for oil) and a "POZZO ABANDONATO AD OLIO" (Abandoned well for oil). The casing is shown with a "POZZO STERILE" (Sterile well).
